

### Mesh Details

<p><b>Perforated Aluminium Security mesh</b></p>		<p>The highly durable and corrosion resistant perforated Aluminium sheet provides a high level of protection without inhibiting your views! Due to its structural grade alloy it is capable of not only being thinner but also stronger when compared to architectural grade Aluminium used on other doors allowing the Perforated Aluminium Security Door to deliver greater visibility and a viewing angle unlike any other.</p>
<p><b>Fiberglass Mesh</b></p>		<p>Ideal for low traffic areas or internally fitted screens the PVC coated fiberglass mesh comes as standard for all doors and windows. If kids, pets, or obtaining a bushfire rating are none of your concerns it will definitely do the job of keeping the bugs out in the most economical way.</p> <ul style="list-style-type: none"> <li>• 0.25mm diameter</li> <li>• 18*14 strands per inch</li> <li>• Flexible and pliable</li> <li>• UV stabilized for long life</li> <li>• Economical</li> </ul>

**DVA  
(Diminished  
Vision  
Aluminum)**

**One Way Mesh  
Heavy Duty**

One-way mesh (D.V.A diminished vision aluminum)

As it sound-this option will limit the visibility into your home while maintaining the view out – allowing you to see but not seen. This achieves this miracle by having thousands of tiny downward facing holes punched into a fine flat sheet of aluminum allowing you to see out without being seen.
